

Let us Help Your Business Adapt to Working From Home

Recently many businesses have been disrupted. **SkyViewTek Managed IT Services** enable your team to work from home securely, for any reason.

Benefits of Managed IT Services

Cyber Security

Cyber Scams Are On The Rise

It's more important now to have **secure** systems in place with oversight. We can setup and

proactively manage your network to minimize risks and **protect** key data, including reliable **data backup, active antivirus, secure firewall,** and **encryption** features.

Collaboration

Working with Your Team

Whether you're at your home office or corporate complex, we recommend and setup the hardware, software, storage solutions, video,

conferencing, and phones you need for a

secure but accessible network that enables collaboration with your team of employees, customers, and vendors

Home Office

Home Network

Employees set up their home networks usually in **compromising** ways, creating insecure environments.

Our team of specialists can work with employees to **secure** the home network and keep company data

confidential. If issues arise, our experts can access your computer **remotely** to troubleshoot and resolve the issue.

Let us design and manage your computer network
